

## Environmental Policy

Reliance Life Sciences participates primarily in medical biotechnology business opportunities; with key initiatives in biopharmaceuticals, pharmaceuticals, clinical research services, regenerative medicine and molecular medicine services, with a vision of attaining global leadership through innovative and cost-effective solutions for a better life.

At Reliance Life Sciences, environment protection is a key concern that is aligned with the context and strategic direction. Reliance Life Sciences strives to integrate environmental management systems in all the business processes and enhance environmental performance towards continual improvement by setting environmental objectives based on significant environmental aspects, compliance obligations besides risks and opportunities.

In particular, Reliance Life Sciences is committed to:

- Give appropriate consideration for the internal and external issues that are relevant to the environmental management system, including specific local or regional conditions.
- Work with neighbors, business partners, suppliers and other interested parties to meet their needs and expectations towards improvement of the local environment.
- Comply with all compliance obligations that relate to Environmental Aspects.
- Provide a Framework for setting and reviewing environmental objectives.
- Provide persons with necessary resources including support and direction to fulfill the requirements.
- Follow a systematic approach to environmental management in order to achieve continual performance improvement through protection of environment and prevention of pollution considering life cycle perspective.
- Encourage efficient use of materials, water, energy and other natural resources while avoiding disposables to the extent possible.
- Support other relevant management roles to demonstrate leadership as applicable to their areas of responsibility.
- Communicate this Policy to all persons working under the control of Reliance Life Sciences to promote awareness for shared responsibility towards Environment Protection.
- Plant trees, develop green belts and promote lush green surroundings for increasing biodiversity, preserving ecosystems and minimizing adverse climatic changes.
- Make this policy available to the interested parties.
